Experience

Cognifyz Technologies   **Dec. 2024 – Feb. 2025**
Full Stack Development Intern

- Completed an Internship at Cognifyz Technologies.
- Project task: Advanced Server-Side Functionality, Advanced API Usage and External API Integration, Database Integration and User Authentication.
- A highly motivated Full Stack Development Intern with hands-on experience in enhancing server-side functionality, integrating external APIs, and implementing secure database systems. Gained proficiency in API usage, external API integrations, and user authentication, contributing to the development of scalable web applications.

Projects

booking website | *Node.js, Express.js, JavaScript, Bootstrap, MongoDB*   **January 2025**

- I built a full-stack booking website using Node.js, Express.js, MongoDB, JavaScript, Cloudinary, Bootstrap, MongoDB Atlas, and Render.
- Key features include exploring booking hotels, villas, islands, beach wedding halls, and more, integrated Mapbox for an interactive map experience, user authentication for secure login signup, and managing rental assets and reviews.
- Enhanced user experience with real-time availability, detailed property listings, and secure transaction processing.
- Building a scalable platform for seamless travel bookings, focusing on personalized recommendations, advanced mapping features, and secure user management.

Resume Builder Web Application | *HTML, CSS, JavaScript, Node.js, Bootstrap, MySql*   **November 2024**

- Created an Web application using HTML, CSS, JavaScript, Node.js, Bootstrap, MySql
- This application focuses on creating visually appealing resumes using various templates and fonts. It also allows users to add links to their online profiles, such as LinkedIn and GitHub.
- The application is simple to use but lacks advanced features like skill suggestions or personalized feedback.
